FastVPN affiliate guide

Discover how you can promote one of the best VPN services to your audience
We’re proud to introduce FastVPN’s easy-to-use service - a virtual private network that helps people connect online safely by providing an encrypted connection to the Internet.

- FastVPN allows people to browse online anonymously and unblock streaming services unavailable in their region.
- It includes features such as Kill Switch, Auto-Connect, and can bypass network traffic sensors that detect and block VPNs.
- Enable your audience to browse online safely while increasing your earnings.
FastVPN product features

FastVPN provides outstanding value to affiliates

Ultra-fast network
Our high-quality servers provide people with a speedy, powerful VPN service. It’s ideal for streaming, accessing work files remotely, and online gaming.

Easy to set up
Installing FastVPN’s app is easy and has simple instructions for all your devices. Our friendly customer support team will also provide 24/7 support to your audience.

Unlimited bandwidth
Stream, download and browse online securely from anywhere. FastVPN enables people to share large files or stream content - no restrictions apply.

Protect all devices
Your audience can work, stream, and browse the Internet anonymously with one FastVPN account for all devices.

DNS leak protection
If your Domain Name System (DNS) leaks, your Internet service providers (ISP) will know which websites and apps you’ve been using. FastVPN’s integrated and secure DNS will protect your audience from such leaks.

Data encryption
FastVPN protects users from targeted and indiscriminate attacks with trusted and secure protocols such as IKEv2 and OpenVPN.

75+ locations and 1000+ servers
We have servers in over 75 locations in 50 countries, so your audience can choose the connection they want, including specific cities.

No-logs
With our no-logs guarantee, FastVPN will never track or log your audience’s browsing habits. What they search for online is private.

Always Protected + Kill Switch
Kill Switch blocks all Internet traffic if a user’s VPN connection stops working. That means your audience’s privacy and IP address will remain secure if their server ever disconnects.
